

# Steven Byram Roberts | Curriculum Vitae

✉ steven94@vt.edu • 🌐 steven-roberts.github.io • 🐙 Steven-Roberts

## Education

---

### Virginia Tech

*Ph.D. candidate in Computer Science, 3.97 GPA*

*Fall 2016–Summer 2021*

Member of Computational Science Laboratory and advised by Dr. Adrian Sandu

### Virginia Tech

*B.S. in Computer Science and B.S. in Mathematics, 3.98 GPA*

*Fall 2012–Spring 2016*

Highest GPA in both graduating classes

## Skills and Qualifications

---

**Programming Languages:** Proficient in MATLAB and Mathematica, experienced with C (including OpenMP and MPI), C++, Python, CUDA, C#, and Java

**Mathematics:** Strong background in linear algebra, numerical analysis, and differential equations

**Web Development:** Experienced in HTML, JavaScript, Node.js, CSS, and creating Chrome Extensions

**Databases:** Experienced with SQL databases and basic querying

## Work History

---

### Virginia Tech Computational Science Laboratory

*Research Assistant*

*Spring 2015–present*

- Designing, analyzing, and testing new multirate time integrators for numerically solving multiscale differential equations
- Developing new implicit-explicit (IMEX) methods suitable for stiff problems and differential algebraic equations.
- Creating a new framework for multimethods based on partitioned general linear methods

### CS 4234/5234: Parallel Computation

*Graduate Teaching Assistant*

*Fall 2019–Spring 2020*

- Held weekly office hours to help students with assignments
- Taught ten of the classes on topics including OpenMP, parallel performance metrics, and GPU computing with CUDA

### Lawrence Livermore National Laboratory

*Intern*

*Summer 2019*

- Developed new implicit multirate Runge–Kutta methods for solving stiff, multiscale systems of ordinary differential equations
- Compared and implemented variants of multirate backward differentiation formula methods

### Lawrence Livermore National Laboratory

*Intern*

*Summer 2018*

- Implemented and optimized finite element operators for GPUs using CUDA
- Achieved 10 to 100 times speedup over other CPU and GPU implementations
- Contributed to the open-source project libCEED

### NASA Glenn Research Center

*Intern*

*Summer 2017*

- Created 1D hybrid direct kinetic simulation of a Hall thruster
- Developed software in C++ from the ground up
- Modeled time-dependent velocity distribution functions of various species in plasma
- Gained experience solving hyperbolic partial differential equations with the finite volume method and using visualization tools

### **Insurance Institute for Highway Safety (IIHS)**

*Intern*

*Summer 2013–2016*

- Worked on C# applications for managing vehicle records stored in SQL databases
- Redesigned and updated mobile website
- Set up an OAuth server
- Worked with several frontend web frameworks
- Gained firsthand experience in software development life cycle

### **Web Developer**

*Freelance*

*2015–present*

- Developing and maintaining the website for the Computational Science Laboratory
- Designed and created websites for two Virginia Tech Materials Science and Engineering professors' research groups
- Created four Chrome Extensions used by more than 60,000 users

## **Volunteer Work and Involvement**

---

**Spring 2019–present:** Treasurer of Chess Club at Virginia Tech

**Fall 2017–Fall 2019:** Volunteer for Virginia Tech CSRC Career Fair

**2016:** Volunteer Math Tutor for Teacher Praxis Preparation

**2013–2015:** Galipatia Academic Committee Member

## **Recognitions and Accomplishments**

---

**Fall 2018–Spring 2020:** Virginia Space Grant Consortium Graduate STEM Research Fellowship Recipient

**2017:** Recipient of Virginia Tech Davenport Fellowship for “research performance and promise”

**2016–present:** Member of Phi Beta Kappa Honor Society

**2016:** Winner of Virginia Tech David Heilman Memorial Award for Outstanding Undergraduate Research

**2016:** Winner of Virginia Tech Math Outstanding Senior, Applied Computational Option

**2016:** Pivot Point Hackathon - Third place

**2014–2016:** Winner of Virginia Tech CS Sophomore, Junior, and Senior Scholar Awards

**2012–2016:** Virginia Tech Dean's List with Distinction

## **Publications**

---

- [1] Severiano González-Pinto, Domingo Hernández-Abreu, Maria S. Pérez-Rodríguez, Arash Sarshar, Steven Roberts, and Adrian Sandu. “A unified formulation of splitting-based implicit time integration schemes”. In: *arXiv preprint arXiv:2011.03688* (submitted to *Journal of Computational Physics* 2021).

## Presentations

---

<b>SIAM Conference on Computational Science and Engineering</b> <i>A New Multirate Time-Stepping Strategy for ODE Systems Equipped with a Surrogate Model</i> Steven Roberts, Andrey A Popov, Arash Sarshar, Adrian Sandu	<b>Online</b>  <i>March 5, 2021</i>
<b>Sayas Numerics Seminar</b> <i>Parallel implicit-explicit general linear methods</i> Steven Roberts, Arash Sarshar, and Adrian Sandu	<b>Online</b>  <i>October 20, 2020</i>
<b>International Conference on Scientific Computation and Diff Eqs</b> <i>Implicit Multirate GARK Methods</i> Steven Roberts, John Loffeld, Arash Sarshar, Adrian Sandu, and Carol Woodward	<b>Innsbruck, Austria</b>  <i>July 23, 2019</i>
<b>Virginia Space Grant Consortium Student Research Conference</b> <i>Practical Multirate Time Integration Methods</i> Steven Roberts and Adrian Sandu	<b>Hampton, VA</b>  <i>April 8, 2019</i>
<b>SIAM Conference on Computational Science and Engineering</b> <i>Implicit Multirate Generalized Additive Runge–Kutta Methods</i> Steven Roberts, John Loffeld, Arash Sarshar, Adrian Sandu, and Carol Woodward	<b>Spokane, WA</b>  <i>March 1, 2019</i>

## Software

---

<b>ODE Test Problems</b> <i>A MATLAB suite of initial value problems</i> Steven Roberts, Andrey Popov, and Adrian Sandu <a href="https://github.com/ComputationalScienceLaboratory/ODE-Test-Problems">https://github.com/ComputationalScienceLaboratory/ODE-Test-Problems</a>	<b>0.0.1</b>
